WORK EXPERIENCE AT RED Fire Engineers - Australia

RED Fire Engineers is one of Australia's largest Specialist Fire Engineering Consultancy. Operating within the building, industrial, road and transport, infrastructure, and environmental market segments, we offer excellence in qualified engineering consultancy services. Whilst the company originates from Australia, we have since 2021 a Swedish office started by Martin Johanson (previously office manager Melbourne) and Carl Pettersson (previously office manager Sydney). Within in the RED Family there are plenty of opportunities to gain knowledge and experience from internationally experienced staff and projects across the globe.

Our Melbourne office is seeking applications from final year students from the Fire Engineering Program to join our team, commencing June 2023.

We have several Swedish fire engineers in our Australian office's and have offered internships for the past 10 years.

THE OPPORTUNITY

The position will provide you with a broad insight into the role of a consulting fire engineer, with exposure to clients, design teams and approval authorities. You will be involved with numerous projects, from the initial phase of preparing fee proposals, design team meetings, detail design and construction inspections.

You will assist our fire engineers with building code assessments and performance based designs. In providing performance based solutions for fire safety design you will undertake qualitative and/or quantitative analyses, inclusive of egress calculations, smoke spread modelling, radiant heat calculations, etc.

You will accompany engineers on site inspections and meetings with clients and approval authorities.

The culture of the RED Family will ensure you enjoy your time in Melbourne outside of work, providing five weeks of paid annual leave for you to see the sights.

QUALIFICATIONS

Final year student of the Lund or Luleå University Fire Engineering Program.

DURATION

Commence June 2023 for approximately 12 months. We are flexible with commencement and completion dates.

SALARY

Your yearly salary will be A$ 58,000. Additionally, 9 % superannuation will be paid, refundable to you upon departing Australia. We will also contribute up to A$4,500 for your airfare, payable on your commencement of employment. Five weeks of paid annual leave will be provided. RED Fire Engineers will also provide accommodation for your first week in Australia.

VISA

The offer is subject to successful approval by the Immigration Department for both RED Fire Engineers to sponsor the position and your visa application. RED Fire Engineers will arrange the sponsorship application, applicants are required to lodge an individual visa application.

CONTACT PERSON

For further information or your application including your CV, cover letter and course results please e-mail: anna@redfireengineers.com.au.

We look forward to receipt of your application by 17 December 2023.

We welcome any questions you might have. Please do not hesitate to contact us!
